

# CAPABILITY STATEMENT

Hospitals now have a solution for families immediately following infant demise.

A new product is now available for families who experience the loss of a child. Families are never prepared to lose a child. Our product provides them the time they want, in their hospital room, with their baby who has died.

Comfort Innovations LLC designed the Caring Cradle® in response to mothers who reported regret not being given enough time with their baby immediately after stillbirth. Mothers want more time to cuddle their babies, take photos, and share time with family and friends. Mothers do not want to be rushed. At the same time, the hospital staff shares an urgency to take the baby as quickly as possible to protect the mother from additional trauma due to the deterioration of the baby's body.

The Caring Cradle® is simple for both families and medical personnel to use. Unlike any other cooling unit, the Caring Cradle® was manufactured specifically for the hospital environment. Bring the Caring Cradle® bedside and plug it in. Resting the baby in the bassinet keeps the baby's body cool and is key to providing more time for the mother to spend with her baby. With a Caring Cradle®, mothers can cuddle their babies at will.

*Today, when hospitals offer a Caring Cradle® immediately following a stillbirth, there is no need to rush the mother or burden the medical personnel with the uncomfortable task of separating the mother and baby. With the Caring Cradle®, the mother determines how much time she needs.*

The Caring Cradle® takes care of itself, so all attention is focused on the mother and her needs.

- designed specifically for hospital use
- simple set up, plug it in and turn it on
- requires no training
- no replacement items or hazardous chemicals
- no alarms to startle mother and medical personnel
- closed and secure system (electrical & cooling components)
- easy to sanitize (any hospital-approved cleaner)
- manufactured in the U.S.A.

Currently we are in over 300 hospitals across the US: including Camp LeJeune, Travis AFB and MedStar Washington DC

Unique Entity ID: **DJAZB3WCKCL3**

CAGE/NCAGE: **9CE47**

FEIN#: **82-0874960**

NAICS: **339113, 423450**

Family owned and operated.

Certified in Florida as Women Owned Business and nationally certified as a WOSB.

Patent No: **10,684,056 & 11,641,951**
